

My Problem:

Increased illnesses due to absences.

Column A: Behaviors	Column B: KSA's	Column C: Measure of Success	Column D: Experience	Column E: Awareness	Column F: Theory
Behavior: Staff are not following proper handwashing procedures.	Knowledge: Handwashing Steps	Quiz to see if they can follow the steps.	Scenario about handwashing with a large group of children.	Data from Centers for Disease Control on handwashing.	Reference to the Centers for Disease Control website.
	Skill: Follow the handwashing steps.	Staff record and upload a video demonstrating the handwashing steps.	Experiment with Cinnamon, cold and warm water. Which washes your hands the best?	Data from Kentucky Public Health.	Reference to the Kentucky Public Health website.
	Attitude: Handwashing is important.	Develop a flyer expressing the importance of handwashing to be hung in your classroom.	Video from CDC on handwashing.	Kentucky Public Health video.	Contact information for my local health department.
Behavior: Children are not isolated during illness.	Knowledge:
