**Please share your memorable moment using the "sticky note feature".**

- Ditto sticky notes
- I struggle with ways to demonstrate materials on remote trainings.
- Take attendance halfway through training or have them answer a few questions in the chat box.
- having to figure out sticky notes ;)
- My son announced in the background: I need a plunger, the toilet is clogged. LOL
- Participant in bathrobe & hair rollers
- My pug was sitting under my desk and fell asleep and started snoring and someone in the call said, "Who's snoring" so I had to stop the training and explain that it was just my dog.
- person fell asleep
- always an issue when microphone is off, unintentionally.
- All the ones I've been in have been pretty normal.
- Tech Check #1: Mute mic/Check speaker volume.
- Someone's entire family coming in and out of the room and the grandmother actually gives her the baby back during her call to pack around.
- Tech Check #2: Video off/on - YOUR CHOICE
- Someone's child used a potty chair in the corner, very visible!!
- I learned how to do so too! Thanks!
- Miming (no sound)
- writing on the screen of someone else's presentation, thinking that no one could see it but me! Just found those highlighting functions and was trying them out!
- Goat Zoom bombers
- a sneak peek into potty training techniques.... nothing like holding a meeting while also having to sing the potty song while a toddle practices his aim during a zoom meeting
- Internet goes down
- I was on a Zoom meeting and asked that the participants turn on their cameras. One person was at the salon under the hair dryer!
- Power went out
- This is the first time I have used the jamboard! Love this!
- I forgot about this, one of the presenters obviously had forgotten about the meeting and had just woken up. The rest of the presenters kept cool and calm while she got it together, but it was funny.
- Tech Check #3: Open Jamboard in new tab/window. Link in chat.

**Common Terms:**

webinar - a presentation or workshop that is transimited via the internet. Webinars will have interactive elements - like discussions.

online - an internet browser based training session.

independent study - instructor led, where lessons and assignments are given and participants work independently, but there is regular contact with the instructor.

hybrid - a blended session that includes face to face (or webinar) instruction with online or independent study activities.

**What is a Learning Managment System (LMS)**
An LMS is a platform (typically a website) that maintains your trainings and allows users access to it.

An LMS is not required for online training, but some things to keep in mind, if you choose to have one:

- What is the cost/fee?
- Do they accept payments for me?
- What type of security is in place for personal information.
- Is it useable on mobile and desktops?
- Who owns the content once it is placed on the LMS?
- What type of content can be put on the LMS?

**Modes of Learning:**
mini-lecture, demonstration, brainstorm, classroom observation, written assignment, case study, handouts (to be completed), discussion boards, games, videos with questions, reading with questions, role play, poster activity, etc.

**Presentation of Content**

How could you use a website in online learning?
How have you seen a website used effectively?
What have you liked or not liked about websites for online learning?

**Please share your takeaways using the "sticky note feature".**

Breakout Room #1

I like to use a website as a visual demonstration for how to navigate the website resource. Also to show a video from a website (like Youtube)

I have never heard of Jamboard - very excited to use with my trainings!

www.thinkific.com

Don't forget to add your takeaway notes!

Some are comfortable some are not.

Do videos count as "website" used?

Excited to use Zoom Breakout rooms for deeper discussions.

What is the cost of Jamboard?

Dislikes: making sure when you share your screen the participants can see & hear okay

From Jenni Jacobs - https://lifterlms.com/

I don't like the independent online modules bc I really crave human interaction. We're all here to learn from one another

Dislike: ensuring video sound is shared/heard by participants.

www.learndash.com

How to demonstrate materials.

---

As the trainer you follow all regulations pertaining to online learning.

However, YOU are able to decide what is required for completion of the course, in order to receive credit. And, if applicable, when it is due.

Entering Data into ECE-TRIS

Webinar - similar to a face to face session in that there is a specific day/time to be present for credit.

Hybrid - All components must be completed prior to credit being issued.

Online/Independent Study - information is input into ECE-TRIS, prior to the session. A "shell" is created where credit is issued as participants complete session.

**Data Entry and Online Training**

What information have you collected/need for ECE-TRIS?
What are some ways that you take "roll" in an online session?
How can you ensure that people are in the session?

**Please share your takeaways using the "sticky note feature".**

**Breakout Room #2**

**Google forms**

I like using the cameras to be able to see people's faces.

**Webmail sends a notification when quiz is completed**

"Sign out" chat - also have them state one thing they learned (turns into part of the evaluation too)

In webinars I have participants type their name in the chat several times (unannounced) throughout the training as well as put them in break out rooms and monitor conversations.

**Use of Polls**

Use of chat at the beginning and the end. At the end they add one take-away from the session in addition to their names.

**Use of breakout rooms**

**Ice breaker/ Roll call**

---

**Final Thoughts**

Based on today, what topics or ideas do you want to explore more?

Share at least 1 idea using the "sticky note feature".

what are those little animal icons that are popping up on the edge of the sticky note? haha, cool!

**More software ideas like Jamboard**

Storyline was mentioned in out breakout room

How to do interactions

I would like to know pros and cons of the various LMS programs.

**Games!**

Jenni Jacobs - jenni@learningprofesor.com I have a website with asynchronous online courses

suggestions on how to do a make it take type webinar.

Evaluations

Yes Interactions

Interactions - online
